### **REASONS FOR ALLOWANCE**

1. Claims 1-24 are allowed in light of the Applicant's arguments. The following is a statement of the examiner's reasons for allowance. The present application relates to traps used to trap and manipulate particles, and particularly relates to optical traps that employ electromagnetic fields to trap and manipulate micro-particles. Regarding claims 1, 11, 12, 18, 19 and 23, the prior art fails to disclose a plurality of selectable focal locations with respect to the focusing element on the adjacent substrate. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

2. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Other Information/Remarks***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Walt et al. (US Patent 6,991,939) is the patent of the cited US patent publication 2003/0032204.
